juancerritos69@gmail.com

PROFILE

Motivated aspiring software engineer with hands-on experience building software projects using Python, JavaScript, HTML, and CSS. Strong foundation in problem-solving, automation, and algorithmic thinking, including developing an evolutionary AI system for a Minecraft speedrunning bot. Adaptable, self-driven, and eager to grow through mentorship and real-world software development experience.

TECHNICAL SKILLS

Collaboration	Debugging
Sql	Css
Agile Development	Html
Version Control	JavaScript
Git	Python

PROJECTS

❖ Evolutionary AI – Minecraft Speedrunning Bot (Python)

Designed and implemented an evolutionary AI system to optimize agent behavior across generations. Created a checkpoint-based fitness model where agents earned or lost points based on progress and time efficiency. Evaluated multiple autonomous agents per generation and evolved behavioral parameters using selection and mutation. Improved system performance through iterative refinement, debugging, and performance analysis.

❖ Web Development Projects (HTML, CSS, JavaScript)

Built responsive web pages and basic interactive user interfaces. Implemented frontend logic to handle user input and dynamic content. Practiced clean code organization and debugging across multiple projects.

❖ Automation & Scripting Projects (Python)

Developed small automation scripts to streamline repetitive tasks. Focused on writing readable, maintainable code and improving efficiency.

TECHNICAL EXPERIENCE

❖ Information Technology Intern, Godley Independent School District Present

Provided IT support by resolving hardware and software issues, managing support tickets, and assisting users with system setup in fast-paced environments. Maintained accurate documentation and collaborated with team members to ensure reliable connectivity across the campus.

- Resolved complex technical issues, improving system efficiency and user satisfaction.
- Streamlined IT operations by managing support tickets and optimizing troubleshooting processes.
- Maintained comprehensive inventory records using Google Sheets, enhancing resource tracking.

EDUCATION

❖ Western Governor University

Bachelor's Degree in Software Engineering

(In Progress)

Jun 2026 — Apr 2027

Salt Lake City

ADDITIONAL STRENGTHS

- ❖ Strong problem-solving and analytical thinking
- ❖ Clear technical communication
- ❖ Comfortable learning new technologies quickly
- ❖ Open to feedback and continuous improvement
